PROGRAMME OUTCOME

This Bachelor of Science (BSc) programme equips learners with advanced theoretical knowledge and practical programming skills, preparing them for professional careers in software development, systems programming, and technology innovation.

- **Apply programming paradigms such as procedural, object-oriented, and functional programming**
- **Develop applications using multiple programming languages (e.g., Python, Java, C/C++, JavaScript)**
- **Design and analyze algorithms and data structures efficiently**
- **Build software systems following engineering principles and best practices**
- **Debug, test, and maintain reliable and scalable programs**
- **Understand compiler concepts, language syntax, and execution models**
- **Work with databases, APIs, and system integration**
- **Apply software security and performance optimization techniques**
- **Use version control and collaborative development tools**
- **Demonstrate professional communication, teamwork, research, and problem-solving skills**

This programme ensures graduates can develop high-quality software solutions, adapt to new programming languages, and perform confidently in professional, academic, and research environments.
